- (d) If an economic effect is predicted, please briefly describe how the effect will occur.

Most of the radiation installations in new classifications had already been moved administratively so they are already paying the different fee. Depending on the classification, however, would determine whether the effect would have negative or positive effect for the radiation installation.

- (c) Will the rulemaking have an indirect effect that may result in increased administrative costs? Will there be any change in requirements such as filing, documentation, reporting or completion of forms? Compare to current requirements.

None anticipated.
