Please click below to view the specific narrative, documentation and verification letter requirements for each position. As you complete this part of the IPEM application, remember that the narrative, documentation and verification letter are three separate elements. If you are a member of the Inject Writing/MSEL Team, you cannot be a participant of the exercise.

Specific Position Requirements

Exercise/Real World/Pre-Planned Event Narrative

The narrative is specific to each of the six positions. It should include a detailed description of your activities based on your position. Although you will be asked for specific information, you need to pay special attention to two items. These include providing enough information to allow the IPEM Application Review Committee to have a thorough understanding of your involvement and identifying the lessons learned that you will take forward. When completed, this narrative should provide a baseline that not only documents where you stand today, but also help identify how you can improved your capacity to be a more productive member when developing, controlling and evaluating future exercises or managing future real world/pre-planned events. There is no minimum length. The narrative should be a double-spaced, single-sided Word document that is to be included with your IPEM application.

Exercise/Real World/Pre-Planned Event Documentation

The listed documents are specific to each of the six positions. Attach as many of the documents as possible. Identify in your narrative if any of the documents are not available, why they are not available and if you are attaching any other documentation in their place.

**Verification Letter**

A letter verifying the applicant's position in the exercise or real world/pre-planned event.

**Professional Contributions Requirement**

New applicants must complete **only three** of the 17 listed contributions. Please check the five contributions that are being submitted.
